PUBLIC UTILITIES
COMMISSION

I am writing to you to request an extension of time to comment on docket number 2008-0249. We are currently convening a committee of principal engineering consultants to discuss and comment on this new legislation. And as of yet we were not able to complete our analysis in the short time available. We feel it is only appropriate that the voice of the engineering community being affected by this new legislation be given an opportunity to provide feedback to the government.

Certain members of our organization have had an opportunity to meet and perform a cursory review of the document and our consensus is that the current docket, as it stands, will not provide the results intended by the legislation. Please consider allowing us to help the PUC complete the specifications.

We humbly request that the PUC consider extending the date for comment and allow our membership to participate in completion of docket number 2008-0249.

Best regards,

Albert Hahn, P.E.
President, Hawaii Chapter
